HC 88-192
8 November 1988

MEMORANDUM FOR: [redacted] IPC Staff

FROM: [redacted]
Chairman, Collection Coordination Subcommittee, HC

SUBJECT: Discussion of FBIS Automated Requirements Concept [redacted]

25X1
25X1

1. The FBIS concept of automatically tracking all FBIS tasking received through its liaison office appears to be a most useful project that will refine FBIS collection against priority issues and eliminate duplicative acquisition, thereby streamlining the system for using Community analysts. The requirements include NHCPs, CIA/CRES requirements, NIO Warning notes, and direct analyst contact calls. FBIS is aiming for an automated on line system that will allow a great variety of search parameters including search by collector, geographic region, country, topic, priority issue date or expiration. The program may have future application to further automate the NHCPs, and the HUMINT Committee supports the concept. [redacted]

25X1

2. The FBIS proposal should also be coordinated with CIA/CRES to assure compatibility with CRES automated requirements programs. I have requested that the FBIS project officer secure CIA/CRES coordination and provide a revised proposal to IPC reflecting same. [redacted]
